BETTER BLOCK

The Victoria Theater WikiBlock Project will take place over this summer and fall, working to transform this empty lot (see front) into a performance space just feet away from the beloved Victoria Theater.

This new performance space will mimic the Victoria Theater, and will be a way to build momentum around completing the Victoria Theater Project!

To get involved:

Join the Community Builders Group: We need leaders!

The group will meet once per month, to direct the project, participate in a practice build, learn cool things, and have fun!

Opportunity for Kids and Teens: Create and build models!
